**General Information:**

Option 044K002 will amend the performance data in Section 6 of the AFM with an AFM-Supplement to reflect the Enhanced Crosswind Capability for the Dornier 328-100.

**Demonstrated Crosswind:**

The maximum demonstrated crosswind component for take-off and landing is 29 knots with gusts up to 32 knots measured at tower height of 10 m (32.8 feet).

This was demonstrated on a dry runway with both engines operating and was not found to be limiting on a dry runway.

**Landing Configuration:**

For crosswind component higher than 21 kt, the landing configuration is limited to flaps 20°.

**Implementation:**

The information contained in the AFM supplement is EASA approved material and must be carried in the approved basic Airplane Flight Manual when the airplane is equipped with the option.

**Pricing Policy:**

	<b>Special Offer (per aircraft S/N), valid until December 15, 2017</b>	<b>Standard Price (per aircraft S/N)</b>
<b>Serialized AFM-Supplement</b>	5.535,- €	6.920,- €

**Lead-time**

Typical lead time for the AFM supplement is approx. 2 - 3 weeks.

### Exclusions

This modification does not include any costs related to the additional technical support, retrofit of the preconditions or any other work/repairs arising during the modification process.

### General Terms and Conditions

Sales and delivery is subject to 328SSG's General Terms and Conditions for the Sale of Spare Parts as well as to German and US export regulations.

Our General Terms and Conditions are available at:
