Title: Quick Access Recorder (QAR) for Dornier 328 Series

Effectivity

Dornier 328 series

Type Certificate Data Sheet EASA.A.096

Serial No.: All Aircraft

Dear valued Customer,

328 Support Services GmbH is planning an upgrade for the Dornier 328-100 and 328-300. The Quick Access Recorder (QAR) is designed for aircraft with solid-state flight data recording systems and records a copy of the data provided to the FDR (Flight Data Recorder) and ARINC 429 Avionic Bus for easy retrieval.

The QAR have a very light structure (6 oz / 170 g) with a removable Memory Card and a standard USB 2.0 interface for optional downloads.

The data stored in the Memory Card can then be transferred into a Flight Data Management system for post flight analysis to improve your flight operations.

Based on your soonest feedback, 328 Support Services GmbH will offer the upgrade via a Service Bulletin within first half of 2014.

If you have any further questions do not hesitate to contact our Global Support Centre.

Please fill out the form attached and sent it back to 328 Global Support Centre
