Title: Update of Consumable Material List (CML)

Effectivity

Dornier 328
 Type Certificate Data Sheet EASA.A.096
 Serial No.: All Aircraft

Dear Customers,

with the upcoming CAMSIS revision we have extensively revised the Consumable Materials List (CML) firstly to replace obsolete materials and secondly to comply with the new REACH regulations.

Background

The European Parliament launched a regulation concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (**REACH**). This regulation should ensure a high level of protection of human health and the environment as well as the free movement of substances, on their own, in preparations and in articles, while enhancing competitiveness and innovation. This regulation should also promote the development of alternative methods for the assessment of hazards of substances.

To respond to these challenges, the aviation industry has used and will need to continue to use high-performance preparations, mixtures and formulations, some of which contain substances which have been placed in Annex XIV of the REACH regulation 1907/2006 – implemented by the European Chemicals Agency (ECHA) – or which could be placed there in future.

Recommendation

Customers should check their material lists and mark REACH compliant products in their system. Use alternates when possible.
