

## CSI-328all-2015-02 Rev.1

### Title: LDG Overhaul - Forecast & Availability of Spare Parts Reminder

Effectivity

Dornier 328-100 & 328-300

Type Certificate Data Sheet EASA.A.096

Serial No.: All Aircraft

Dear Customers,

Messier Bugatti Dowty has informed 328 Support Services GmbH (328SSG) that they are preparing the next landing gear overhaul campaign for the Dornier 328 and as announced by MBD they aligned their spare catalogue lead-times to the manufacturing lead times.

#### Background

Although MBD's catalogue and lead times are available on their web site, MBD hasn't recorded many orders from customers/operators/MROs reflecting MBD's overhaul anticipation.

Please note that the actual spare situation with several month lead time for certain parts can have a tremendous effect on the landing gear overhaul endurance.

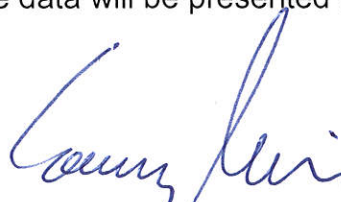

Therefore MBD has asked 328SSG to address this topic again, in order to avoid any unnecessary shortages of required spare parts during scheduled maintenance/overhaul events.

#### Recommendation

Customers are strongly advised to review their planned overhaul requirements, scheduled within the next 3 years and report to 328 SSG. These data will be presented to Messier-Bugatti-Dowty.
